## PROJECT EXPERIENCE

### Safe Lanka Police App | Flutter, NestJS, MySQL

- Developed a cross-platform mobile application to support citizen-police communication with features such as SOS alerts, crime reporting, complaint tracking, fines management, traffic updates, and chatbot support. Contributed to frontend, backend integration, API testing, and usability improvements.

### OPULENZA Estate Agent Web Application | React, Vite, JavaScript, React Router, Jest

- Built a responsive real-estate web application with property search filters, listing pages, property detail views, image galleries, floor plan tabs, map sections, and favourites functionality. Used reusable React components, JSON data, responsive CSS, and Vercel deployment.

### SmartCampusAPI | Java, JAX-RS, Jersey, Maven, Apache Tomcat, Postman

- Developed a RESTful API for managing campus rooms, sensors, and sensor readings. Designed resource-based endpoints, implemented filtering and reading history management, and tested API functionality using Postman.

### Ornella Planner | Python, SQLite, CSV

- Built a command-line task management application with CRUD operations, search, priority levels, due dates, overdue tracking, task statistics, and CSV export. Used SQLite for persistent data storage and structured database handling.
